

## *Why CHADIS?*

- CHADIS improves the diagnosis and management of health, emotional and behavioral issues; helping us address parents' concerns about their child's development.
- CHADIS empowers families to more fully express their concerns; ensuring issues are addressed during the visit and allows for all caregivers/guardians/teachers and adolescents to have their "voice" heard during well visits.

Please remember to register your child NOW at [www.chadis.com](http://www.chadis.com). and sign on before each well visit to complete the assigned questionnaires.

*Thankyou for helping us implement this latest developmental tool!*
